This is not an informative and factual blog post. The 37 Best Websites to Learn Something New Forget overpriced schools, long days in a crowded classroom, and pitifully poor results. These websites and apps cover myriads of science, art, and technology topics. They will teach you practically anything, from making hummus to building apps in node.js, most of them for free. There is absolutely no excuse for you not to master a new skill, expand your knowledge, or eventually boost your career. You can learn interactively at your own pace and in the comfort of your own home. It's hard to imagine how much easier it can possibly be. 1. Khan Academy: Khan Academy is a non-profit organization with the mission of providing a free, world-class education for anyone anywhere. The organization produces short lectures in the form of YouTube videos. Topics include science, math, computer programming, history, and more. There are also exercises and helpful tools like a calculator and a Kaplan SAT practice test. 2. TED: TED talks offer 18 minute educational videos from some of the world's leading experts on technology, entertainment and design. TED features talks from Bill Clinton to Jamie Oliver to Steven Johnson on topics as diverse as climate change solutions to how video games can change our lives for the better or how cities can learn from nature to build better communities. 3. Rosetta Stone: Rosetta Stone is a language learning software that allows you to learn a language through spoken lessons, visual animations, dialogs, stories, songs and games. 4. PBS LearningMedia: PBS Learning Media is a database of online resources for K-12 educators on the web that allow students to access information on various topics about science, history, sports and more. The resources are organized into categories so users can easily find the content they are looking for. 5. Duolingo: Duolingo is an online resource which provides free language education to people all over the world. It is a website where you can learn a foreign language through word games, quizzes and challenges. 6. TED-Ed: TED-Ed is an initiative of the non-profit devoted to spreading educational ideas, through videos created by world experts in the topics of science, technology, design, and entertainment. TED-Ed features both TEDTalks (video lectures) and TEDx talks (short clips). 7. PBS Kids: PBS Kids offers fun educational videos for children who are learning English or Spanish. 8. Code.org: Code. org is a non-profit that was founded in 2013 by the tech industry to get more students coding. The organization provides free programming classes for elementary, middle, and high school students interested in pursuing technology careers. 9. Khan Academy for Education: Khan Academy was started in 2010 by Salman Khan with the purpose of providing educational material to people around the world without any cost or limitation on distribution or use. Its goal was to provide an education that would help people learn how to think for themselves, create their own knowledge, and develop their own learning curriculum through teaching them about different subjects including math, science, history, computer science and more.. 10.
