irc channel? peternalex: what are you trying to do? kevdog: if you use ubuntu server xing, i would think the iso has a md5checker, else look at the torrent kevdog: it's in /etc/default/grub nacc: My system is in VMWare -- I can't get Ubuntu server running on this virtual system I would like to set up a cron to clean up from root, but I don't want to delete all the files (it's a torrent tracker). Is there a way to only clear the folder ~/.tracker instead of the whole partition? nacc: What should I edit in the grub file? kevdog: i have no idea nacc: Yea, there is no grub file -- no kernel files? kevdog: /etc/default/grub peternalex, maybe someone from #vbox can give you the answer, this page gives you some clues >> kevdog: yes, there are no kernel files, just the config that grub uses nacc: I do have the grub file -- it looks to be empty: #GRUB\_DEFAULT=0 #GRUB\_HIDDEN\_TIMEOUT=0 #GRUB\_HIDDEN\_TIMEOUT\_QUIET=false #GRUB\_TIMEOUT=0 kevdog: what are you trying to do? nacc: I'm trying to install ubuntu server kevdog: so you are using VMWare? nacc: Yes nacc: The install for ubuntu server will run through the ubuntu desktop install. That is what I would like to install 82157476af
